

Question:

Company	Question	Priority
	If I had a trial Copilot Studio with existing agents now -will I get to keep these agents when I convert to pay-as-you-go for Copilot Studio monthly subscription?	

Answer:

I personally have not used these agents yet, but the GPT gives the following:

*“Yes, when you transition from a trial to a pay-as-you-go subscription in **Copilot Studio**, your existing agents and configurations will remain intact. Microsoft's documentation confirms that after upgrading your license, you can continue using the same agent in the same environment, with additional capabilities becoming available post-upgrade.*

Recommendations:

1. **Ensure Consistent Environment:** Maintain the same environment (tenant and resource group) during the transition to retain your agents.
2. **Review Microsoft Documentation:** Refer to Microsoft's official guidelines for any specific considerations during the upgrade process.
3. **Backup Your Agents:** As a precaution, export or document your agent configurations before making changes.
4. **Understand Billing Implications:** Be aware that certain features may incur additional costs under the pay-as-you-go model.

For detailed information, consult Microsoft's official documentation on Copilot Studio licensing and subscriptions.”

I suggest you check the following official documentation before processing:
